Fatures

Our stainless column refrigerators are as beautiful as they are Functional. With an elegant 304 stainless cladded door and matching pro handle these columns match perfectly with our Fulgor Milano stainless cooking products and feature a brilliant white aluminum interior with brushed aluminum and stainless accents. Food preservation is the name of the game, by combining elegant design and commercial quality to ensure the highest performance preserving the organoleptic qualities of your precious ingredients. A dedicated compressor and evaporator provide consistent and precise temperature throughout.

SPECIFICATIONS

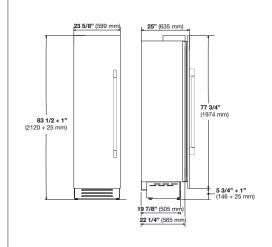

Stainless Steel Exterior
Microbeaded stainless steel crisper drawers with
soft closing
Height adjustable glass shelves
Luminous white interior
Multilevel LED lighting
Professional handle kit included

When installing our top compressor models in a standard NA cut out it is recommended to use the J-profile trim kit to close the lateral gap of the appliance, alternatively use the standard plastic mounting clips when installing unit into Euro width cabinet.

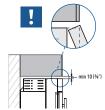

Installing in the unit in a standard North American "cutout" without the J-profile trim kit, will result in a larger gap along the cabinet opening.

When installing our top compressor models in a new construction, it is recommended to use the European "cutout" dimensions to achieve a minimal gap on the lateral sides and avoid the need to use the J-profile trim kit.

Installing in the unit in a standard North American "cutout" without the J-profile trim kit, will result in a larger gap along the cabinet opening.

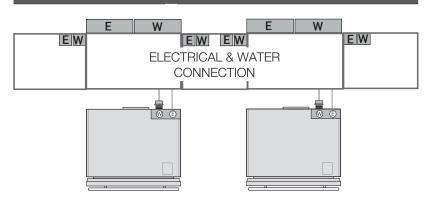

If the units are to be installed inside a cutout or within an enclosed structure, it is necessary to design a ventilation shaft at the back of the cutout to assure proper ventilation at the back of the unit.

Cross-sectional chimney ventilation area should equal 200cm² (31in²).
